

Firefighters/First Responders: Elevator and Feed Mill Fire and Bin Rescue Training Videos

The Minnesota Grain and Feed Association received a grant from the AgStar Fund for Rural America, to produce a video to train volunteer firefighters and first responders on how to respond to a grain bin rescue situation and proper response to a grain elevator or feed mill fire. With constant turnover at volunteer fire departments and in the first responder community, there is an on-going need to provide specific training in the unique area of fighting a grain elevator or feed mill fire and in responding properly to a grain bin rescue (possible suffocation) situation, both at a commercial grain elevator and on-farm. A better trained and educated first responder community was the ultimate goal of this film project. The Training was conducted by the South Central College Fire & Rescue Training Center, North Mankato and the West Community & Technical College Fire & Industrial Training Center, Pipestone.

Grain Bin Rescue/ Firefighter Preparation And Response to a Grain Elevator & Mill Fire

- 1st DVD) Grain Bin Rescue Classroom Training
- 2nd DVD) Grain Bin Rescue On-Site Training
- 3rd DVD) Firefighter Response to a Grain Elevator and Feed Mill Fire
